Compatibility

The PRINT panel has a wide range of application scenarios. It can be installed not only in a wall-mounted position, but also for hanging, stacking, flooring, ceiling, and more. This flexibility allows users to choose based on different space requirements and design styles.

Multiple Installation

PRINT combined with our LUX-LTP LED panels allows you to have complete creative freedom when designing your next project.

LED Floor

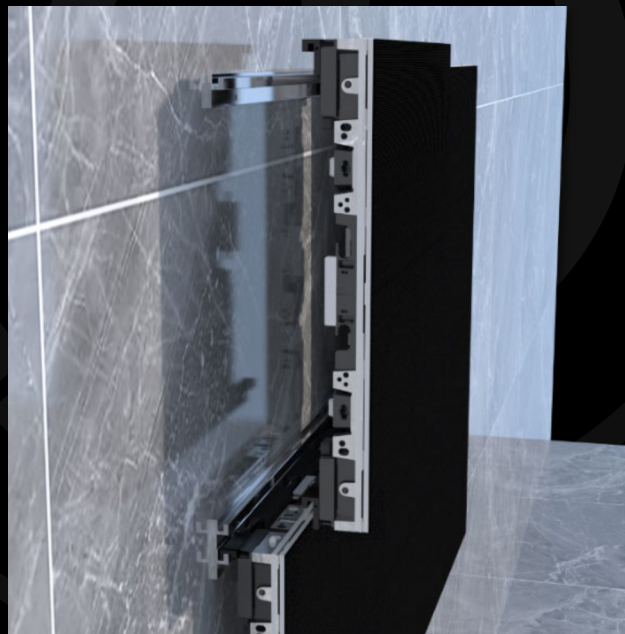

Wall-Mounting

Convenient wall-mounting, with Auroras industry leading mounting solutions we ensure your display is as thin as possible without compromising on uniformity and performance, saving you time on installation and providing the best possible experience.

Wall Rail

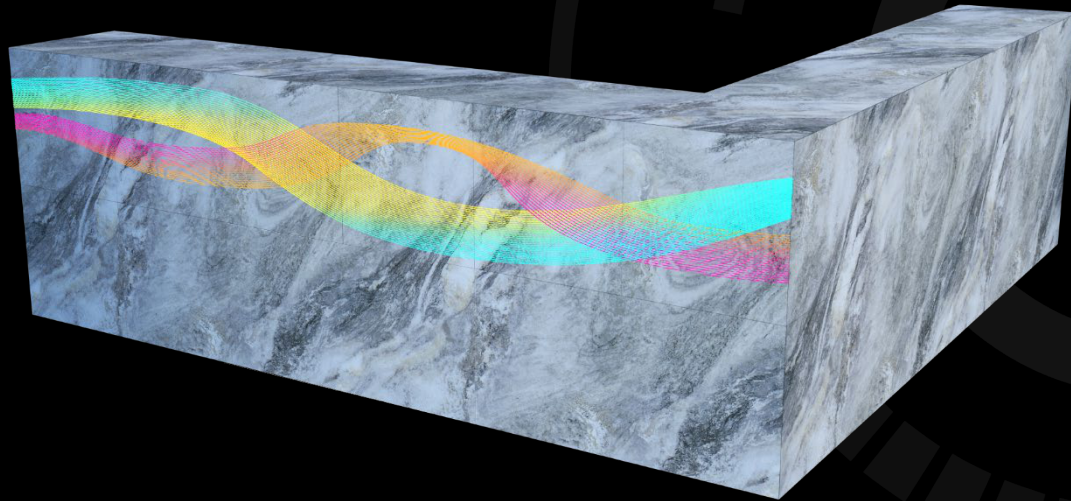

LED Cabinet with Hook

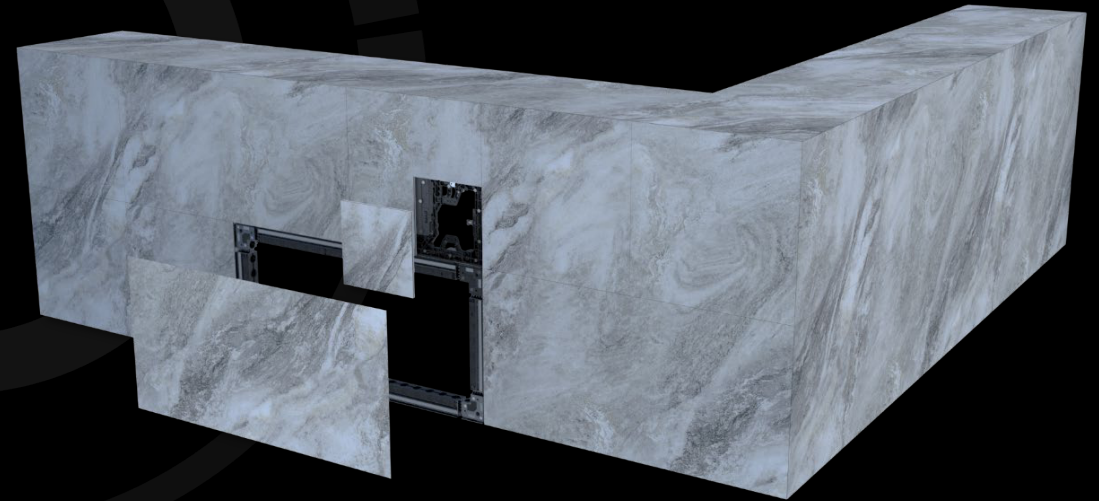

LED Screen

Frame Connection

PRINT can be combined with LED frame system, allowing you full creative control. Installations such as bars, counters, art walls, lobbies, and more, the creative possibilities are endless.

Front Maintenance

PRINT when combined with our LUX-LTP Panels, can be easily maintained from the front, with both the module and control box accessible with simple to use tools.

A supplied suction cup tool will remove the module, while a screwdriver is used to loosen the control box's connection to the cabinet frame, for simple removal through the front of the cabinet.
